To activate Windows 10, you need a digital license or a product key. If you're ready to activate, select Open Activation in Settings. Click Change product key to enter a Windows 10 product key. If Windows 10 was previously activated on your device, your copy of Windows 10 should be activated automatically.

A digital license (called a digital entitlement in Windows 10, Version 1511) is a method of activation in Windows 10 that doesn't require you to enter a product key. If you upgraded to Windows 10 for free from an activated copy of Windows 7 or Windows 8.1, you should have a digital license instead of a product key

What Makes Windows 10 Unique?

The best windows operating system brings you the most innovative tools and security features that will not only make your device secure but also enables you to perform your daily task in most creative and productive way. Windows 10 uses and combines some cool features of windows 7 and windows 8 which make it stand out from other Microsoft Operating Systems.

Step 2: You right-click on the start button and open Command Prompt (Admin).

Step 3: You use the command “slmgr /ipk yourlicensekey” to install a license key (yourlicensekey is the activation key you got at step 1).

(*Note*: You need to hit [Enter] key to execute commands.)

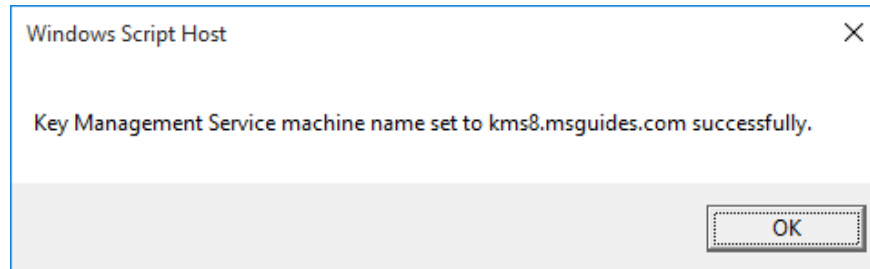

Step 4: You use the command “slmgr /skms kms8.msguides.com” to connect to my KMS server.

```
Administrator: Command Prompt

C:\Windows\system32>slmgr /ipk W269N-WFGWX-YVC9B-4J6C9-T83GX
C:\Windows\system32>slmgr /skms kms8.msguides.com
C:\Windows\system32>
```

Step 5: The last step is to activate your Windows using the command "slmgr /ato".

```
Administrator: Command Prompt

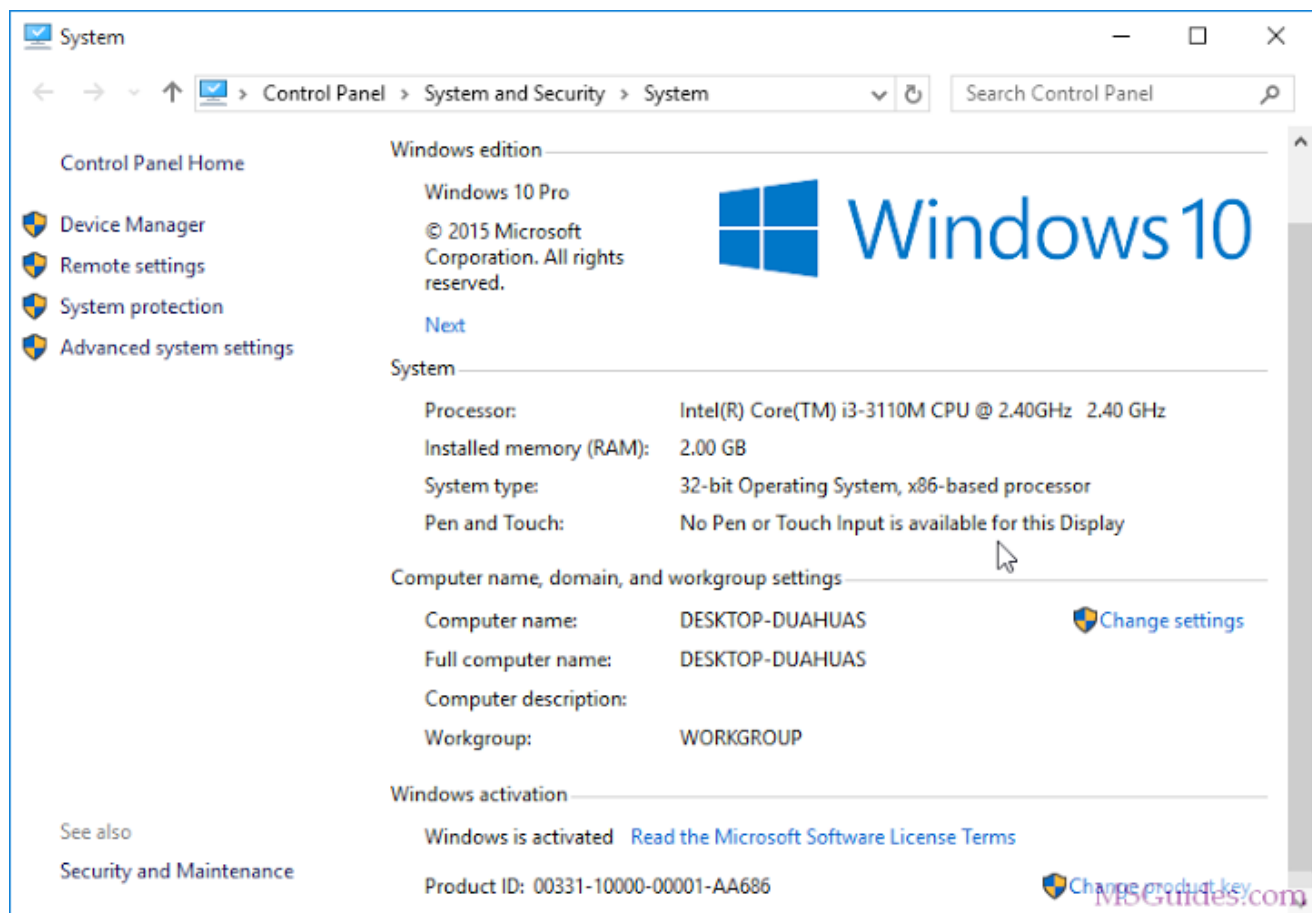

Microsoft Windows [Version 10.0.10240]
(c) 2015 Microsoft Corporation. All rights reserved.

C:\Windows\system32>slmgr /ipk W269N-WFGWX-YVC9B-4J6C9-T83GX
C:\Windows\system32>slmgr /skms kms8.msguides.com
C:\Windows\system32>slmgr /ato
```

You check the activation status again.

Windows 10 Features

1. Bundled apps

The Mail app adds user-configurable swipe gesture controls and POP3 email support. Google Calendar support is added to the Calendar app. The Settings app is expanded to have similar functionality as the Control Panel, albeit with a Metro-style user interface. The Map app can download maps for offline use.

2. Microsoft Edge

Microsoft Edge is the new browser for Windows 10 and is the successor to Internet Explorer, although Internet Explorer will remain for compatibility and legacy purposes. Cortana has been integrated into Edge, accessible by the option "Ask Cortana" in the right click menu, as well as a Reading View and the ability to write notes directly on web pages and save to OneNote. A Reading List feature has also been added, where users can save articles or other content to be accessed and read later. Microsoft Edge also includes a Share button on its toolbar where tapping or clicking on it will bring up the system Share panel, where users will be able to share a webpage to installed applications such as Reading List or third-party apps such as Facebook and Twitter. Since its release, this browser has scored 402 out of 555 points on HTML5test

3. DirectX 12

Windows 10 includes DirectX 12 alongside WDDM 2.0. Unveiled March 2014 at GDC, DirectX 12 aims to provide "console-level efficiency" with "closer to the metal" access to hardware resources, and reduced CPU and graphics driver overhead. Most of the performance improvements are achieved through low-level programming, which can reduce single-threaded CPU bottlenecking caused by abstraction through higher level APIs. The performance gains achieved by allowing developers direct access to GPU resources is similar to other low-level rendering initiatives such as AMD's Mantle, Apple's Metal API or the OpenGL successor, Vulkan. WDDM 2.0 introduces a new virtual memory management and allocation system to reduce workload on the kernel-mode driver.

4.Cortana

Windows 10 has brought the Cortana assistant from Windows Phone 8.1 to Windows 10. By default, Cortana appears as a search pane on the taskbar, but can be changed into a button, like in tablet mode, and can be activated by voice using the command “Hey Cortana”, when a user searches the Start menu, or when a user searches the Cortana search pane. With Cortana, users can ask Cortana questions about the weather, calendar events, and other types of notifications, along with online information. Cortana currently requires a Microsoft Account to function.

5.Start Menu

Windows 10 reintroduced the start menu as seen in versions of Windows prior to 8. However, unlike these versions, the new start menu includes live tile features from Windows 8. It is possible to resize the Start menu and view recently added and most used applications. It can also be made full screen for tablet users or users that prefer a Windows 8-like experience. The right hand side of the Start menu can be used to pin tiles. The menu can contain a limited amount of columns, depending on the screen resolution. These columns can be divided in groups that can all have their own title. Every group is divided into 6 or 8 other columns, depending on the user’s settings, to allow either 6 or 8 small sized tiles next to each other.

I hope you will find right windows 10 serial keys for your pc .
